### SALT Services are BACK!

### SALT Services are back

Finally, after a few false starts SALT Services is ready to start training courses. The global pandemic isn't over just yet, but we are ready to return albeit to a new normal. There will be a few changes due to covid risk assessments, but delegates will still experience our state of the art training and get the best STCW training in Scotland. As a reminder delegates have access to ample off street free parking, easy access from the city bypass and local bus routes. Full joining instructions will be emailed to delegates once course bookings have been confirmed.

### Training Back-Log

We do have a considerable back-log of clients and we will do our best to accommodate everyone. Current covid restrictions and training risk assessments have limited our capacity to a max of 6 delegates. Our website has full details of our courses and costs. **Please note that due to course booking restrictions our priority is to take bookings (initially) for full basic week safety courses. We have added additional PST/PSTU dates to help with increased demands.** If you require update training courses please call or email us to see if we can accommodate you. If you have multiple booking requirements we can offer bespoke training dates so please get in touch with us to arrange that for you.

## Roadmap for SALT training courses

What can SALT Services/IHF training offer you and your organisation? It is becoming more prevalent that organisations are now utilising 'in-house approaches' to deliver training to their staff and visitors. SALT Services/IHF provide Risk Assessment, Safety, Cyber Security Training and now we can provide off-the-shelf or company specific e-learning courses that can be accessed on PCs, tablets and mobile phones. We can deliver existing courses, adapt a course to meet your requirements or create an organic and bespoke course specifically for you. We can deliver it on-site or in our state-of-the-art classroom facilities in Colinton. On request, we can even carry out a training needs analysis (TNA) and map out exactly what training your staff require within your business. Bespoke courses, availability and prices are available on request.
